

CWIP Program 2018

There is more detail on the web site www.widevine.com regarding the training program particulars and schedules. Click on CWIP Program box for this information.

To summarize there are some contracts that need to be accepted prior to attending the training programs. These are click to accept Agreements.

NDA – A Google NDA must be accepted if one is already not in place with another Google entity.

Master License Agreement: Right to use license

CWIP Agreement: Details the roles and responsibilities of both parties.

Commercial Order Form: Referenced in the CWIP Agreement[Section 5 Term and Termination] is a one-page form that indicates the commercial terms of the CWIP Certification Program. This must be physically signed and dated and PDF back to me in order to get Google's countersignature and I will return this to you for your records. This information will then be used for invoicing. Invoice payment is due 30 days from date of invoice unless otherwise agreed.

There are no license fee's so all the documentation and SW is free.

There is no fee for the use of our Cloud License Server Service.

There is a fee for CWIP of \$5,000USD per year and the first year fee includes the cost of the 2 required training seats.

Additional training seats are \$2500 each, one time fee.

In order to move things forward with the contracts I will need:

Legal Company Name

Address

Name/Title/Email/Phone number of the person who will accept the Agreements.

Links to these Agreements will be sent for acceptance and once the CWIP Agreement is accepted I can then generate the CWIP Commercial Order Form referenced above.

Once the Order Form is signed you will get further instructions on filling out a profile and registering for the next available classes.

TRAINING SUMMARY:

- Introduction to Widevine products
- Integration: Design aspects of Widevine integration such as architecture, systems planning, scalability, etc.
- Installation and Upgrades: Software installation and upgrade processes
- Operations: Daily operational tasks and monitoring of a deployed Widevine system
- Support & Troubleshooting: Overview of level 1,2,3 support tiers in terms of troubleshooting and maintaining a Widevine DRM system
